

Corral the Animals

The Granger family raises llamas and horses. They have decided to build new barns to house the animals. They want each animal to have its own space in each barn. Help them by drawing fences on the barn plans below.

Decision Making

1. Draw only 2 square fences on the plan for the square barn so that each of the 9 llamas has its own area.

2. Draw only 2 triangle fences on the plan for the circular barn so that each of the 13 horses has its own area.
