

Set the Table

Algebra

1. Complete the table by evaluating each expression. Use the values given for n . The first row has been completed for you.

	$n = \frac{1}{2}$	$n = 2\frac{1}{4}$	$n = 3\frac{2}{5}$
$2n$	1	$4\frac{1}{2}$	$6\frac{4}{5}$
$1\frac{3}{4}n$			
$1\frac{5}{16}n$			
$\frac{7}{8}n$			

2. Create your own table. Use 4 expressions and 3 values for n . The expressions and values should all be fractions.
